### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, line 8, delete "a" and change "filament-wounded" to ---filament-wound---.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: Regarding amended claim 1, the prior art, in particular Joho, does not teach a cylindrical armouring sheath consisting of a synthetic-resin impregnated, filament-wound fibers. The armour sheath "Aussenzyylinder" 33 ("outer cylinder") of Joho comprises a metallic, non-magnetic material such as austenitic steel or bronze to reduce electrical loss (c.2, lines 49-54). Further, Joho's explicit intention to use a conductive material for the sheath teaches against any combination with an impregnated, filament-wound fiber sheath, since a fiber sheath is non-conductive and would not reduce electrical loss.

### ***Drawings***

3. Corrected replacement drawings were received on 11 April 2005. These drawings are approved.
